

JICA Dialogue Program: Country Focused Training for Solid Waste Management in Sri Lanka (2)

Last year's successful participation of the NUGELP students, 4 students (Haikal, Francis, Lam and Hung) participated in JICA Dialogue Program: Country Focused Training for Solid Waste Management in Sri Lanka this year from October 10 to November 1. Lam and Hung joined as a part of their GRI program.

This training consisted of lectures by local government officers (Aichi Prefecture and Nagoya City), JICA experts and consultants, as well as site visits to final landfills, incinerations and recycling facilities. It was a good opportunity for the students who focus on waste management to learn policies on waste management.

In addition, the students were given an opportunity to create inception reports and action plans with other trainees from Sri Lanka, for which they received a certificate from JICA.
