

GRI (Global Research Internship) were held at NUGELP

On November 18 and December 2, Presentation Sessions on GRI (Global Research Internship) were held at NUGELP. 14 students on November 18, and 7 students on December 2 reported their internship experiences to the audience. Many students felt that their internship was successful to improve their academic skills, as well as to develop their personal experiences. We hope that the students will take a good advantage of what they have learned in GRI in their future researches and job-hunting.
