

Students Delegation from the Philippines (JENESYS program) visited Nagoya University

On April 23, a Students Delegation from the Philippines, visiting Japan on JENESYS (Japan–East Asia Network of Exchange for students and Youth) program, visited Nagoya University. NUGELP professors and current students talked about the Japanese higher education related to the environment including NUGELP and their personal experiences as foreign students in Japan. A very productive discussion took place on NUGELP activities between Filipino students and NUGELP members. We hope those students who visited will come back to NUGELP in the future!
