

NUGELP Consultation for New M2 Students

On September 25, the new M2 students from this fall (Bansao-san, Libut-san, Dacwag-san, Mimi-san) met with NUGELP professors to present their achievements in the past year. In the presentation, students talked about their experiences in NUGELP so far, the progress of their research, GRI (Global Research Internship) achievements, future career, and feedback for NUGELP. Then, in the question and answer session, there was further discussion especially on NUGELP as a program, their research, and general students' life. NUGELP Professors and staff members were happy to see that students are making the most out of their experience in their study and the life in Japan, as well as to receive feedbacks from students.
