

Excursion Program on Water Conservation Efforts

On December 14th and 15th, 19 students and 4 instructors/staff participated in an excursion on water conservation efforts which took them to Tokuyama Dam in Gifu and Japan's largest lake, Lake Biwa in Shiga.

There they learnt about the efforts that went into the design and construction of the dam, and Lake Biwa's ecosystem as well as water conservation activities by the government and the local communities.
